

SHASHWAT SINGH

@ s.singh.3@research.gla.ac.uk

229A, Kelvin Building, University of Glasgow, G12 8QQ, Scotland

I am currently a PhD student at the University of Glasgow and working on probing massive and supermassive black holes using gravitational wave sources to be detected by LISA – a future space-based gravitational-wave detector and electromagnetic transients from ZTF & LSST.

ACADEMIC QUALIFICATIONS

2023	University of Glasgow, SCHOOL OF PHYSICS AND ASTRONOMY, PhD
2027	Thesis title : Revealing the family of massive black holes with LISA Supervisors : Dr Christopher Berry and Dr John Veitch Gravitational Waves LISA Super/Massive Black Holes Population Inference
2022	l'Observatoire de Paris, UNIVERSITÉ PSL (PARIS SCIENCES & LETTRES), M2 – International Research Track
2023	Program combined with courses and research in laboratories. General-relativity Data-analysis Magneto-hydrodynamics High-performance-computing
2021	Sciences et Ingénierie, SORBONNE UNIVERSITÉ, M1 – Paris Physics Masters
2022	Program targeted towards fundamental courses and compulsory lab-work. Advanced quantum mechanics Statistical mechanics Astrophysics & Cosmology Numerical methods
2017	Sardar Vallabhbhai National Institute of Technology, B. TECH, Mechanical Engineering
2021	Four-year program combined with theoretical and experimental work. Data-analysis Fluids - mechanics & dynamics Machines and rigid body motion

- LISA Astrophysics Working Group Meeting, MPA Garching, Germany, Nov 2024. *Constraining EMRI Population using Hierarchical Bayesian Inference*.
- Cosmology from Home, July 2023. *Probing Fuzzy dark matter with lensed Gravitational waves*.
- 3rd International Conference on Condensed Matter and Applied Physics (ICC) - Bikaner, India, October 2019. *Lindblad Evolution and Quantum to Classical Transition of Rabi Oscillation in Single Quantum Dot*.
- 9th International Conference on Gravitation and Cosmology (ICGC) - IISER Mohali, India, December 2019. *Clustering and Predicting Astrophysical events using GW*.
- Python for HPC Workshop by Max Planck Computing and Data Facility (MPCDF)[‡], July 2023
- 2nd MaNiTou Summer School on Gravitational Waves : A new window to the Universe[‡] - Nice, France, July 2023.

CONFERENCES, SEMINARS & WORKSHOPS ORGANISATION

- GR24 & Amaldi16, University of Glasgow, UK, July 2025
- Student Seminar, University of Glasgow, UK, 2024–2025

INVITED TALKS

- Physik-Institut, Universität Zürich, January 2026. *Revealing MBH astrophysics using EMRIs*.
- Institute for Gravitational Research, January 2026. *Revealing the population of massive black holes*.
- LISA Working Group, January 2026. *Constraints on EMRI Populations from LISA data*.
- PyCBC Telecon, April 2025. *Gravitational wave lensing : probing Fuzzy Dark Matter with LISA*.
- LISA Cosmology Working Group, April 2025. *Gravitational wave lensing : probing Fuzzy Dark Matter with LISA*.

AWARDS AND RECOGNITION

2023-26	University of Glasgow Graduate School Mobility Grant
2025	Lord Kelvin or Charles Lindie Mitchell Scholar
2023	University of Glasgow Graduate School scholarship.
2023	Received Erasmus+ funding (EU's program to support education, training, youth and sport in Europe)
2022	Université PSL fellowship for higher education (M2).
2022	Received IPIASMUS grant (IPI Initiative « Physique des Infinis ») towards carrying out an internship at Max-Planck-Institut für Gravitationsphysik (Albert-Einstein-Institut).
2020	Received honorarium by the Max-Planck-Institut für Gravitationsphysik (Albert-Einstein-Institut) for a three-month internship.

RESEARCH EXPERIENCE

- Master Thesis, Max-Planck-Institut für Gravitationsphysik (*Albert-Einstein-Institut*), (Duration : January 2023 – July 2023; Supervisor : Dr M. Zumalacárregui) – Probing Fuzzy dark matter using lensed gravitational waves detected by LISA.
- Lab Insertion Unit, l'Observatoire de Paris, (Duration : September 2022 – January 2023; Supervisor : Dr A. Hees (SYRTE) & Dr N. Korsakova (APC)) – Waveform compression of Extreme-Mass-Ratio-Inspirals (EMRIs) using Singular Value Decomposition.

- Internship, Max-Planck-Institut für Gravitationsphysik (*Albert-Einstein-Institut*), (Duration : April 2022 – July 2022; Supervisor : Dr A. H. Nitz) – Prospects of premerger detections & sky-localization of gravitational waves (GWs), using higher modes.
- Internship, Max-Planck-Institut für Gravitationsphysik (*Albert-Einstein-Institut*), (Duration : June 2020 – September 2020; Supervisor : Dr A. H. Nitz) – Built a prototype analysis for massive binary black hole (MBH) mergers using LISA.
- Dept. of Physics, SVNIT Surat, (Duration : May 2019 – August 2020; Under supervision of Dr K. N. Pathak) – Deep learning for estimating parameters of GWs (CNNs) and sequence-prediction of galaxy mergers (LSTM networks).
- Internship, Dept. of Mechanical Engineering, Indian Institute of Technology Indore, (Duration : May 2019 – July 2019; Supervisor : Dr S. K. Sahu) – Developed a numerical method to study heat transfer effects of a synthetic jet on different materials, and C++ code allowing mesh motion within the model in Ansys Fluent.
- Visiting researcher, Max-Planck-Institut für Gravitationsphysik (*Albert-Einstein-Institut*), (Duration : January 01 – January 09, 2018; Supervisor : Dr M. Zumalacárregui)
- Visiting researcher, Institut Astrophysique de Paris, (Duration : January 01 – January 09, 2018; Supervisor : Prof Marta Volonteri)

LISA - MODULE

2020

🔗 github.com/gwastro/pycbc/commits/master/pycbc/detector.py?author=SSingh087

Prototype for analysis of MBH GWs signals using LISA space-based GW observatory.

The module consists of a simplified LISA orbit and detector response towards a GW signal.
